NOMINEE

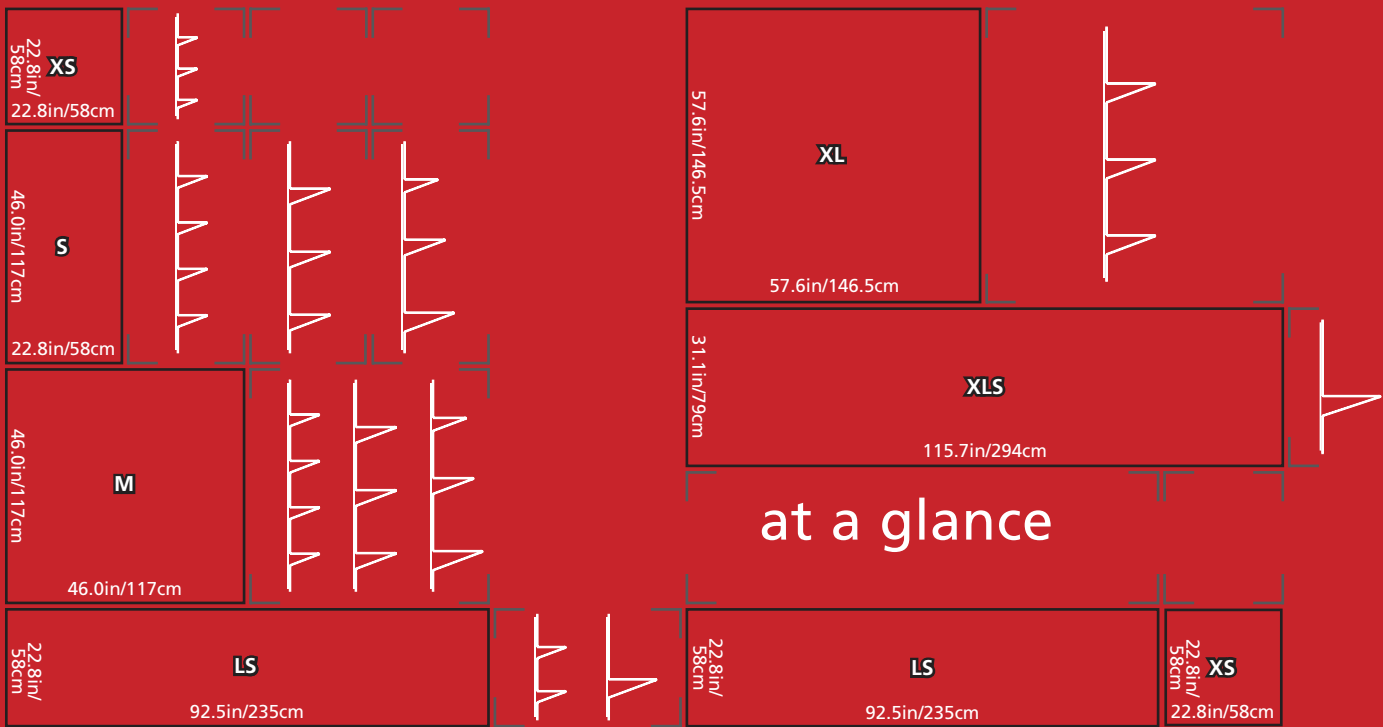

shelf_zzz won the iF product design award 2007 and was nominated for the German design prize 2008!

Made in Berlin • Design: Adrian Lippmann

product information

shelf_zzz shelvesystem for the wall

The horizontals, verticals and supports of shelf_zzz all unfold homogeneously from a 3 mm thin and stable sandwich-board. (aluminum layers on both sides with plastic core) A hidden backbone for wall-assembly gives it stability. A new milling procedure specially developed for this material has enabled the creation of gentle horizontal and vertical curves. Concave and convex corner solutions allow the shelf system to flow around corners as well, adding to its attractiveness. Shelf_zzz can be made in different versions in eleven colours/surfaces – for home or office; as shop furnishings; for kitchen or bathroom. To use more than one shelf element, just add a shelf beside it or one above the other with a gap of one centimeter to get more space. The attachment to the wall is by use of the supplied aluminium profiles on the back side. The standard measurements and colour samples you will find on following pages on this the catalogue.

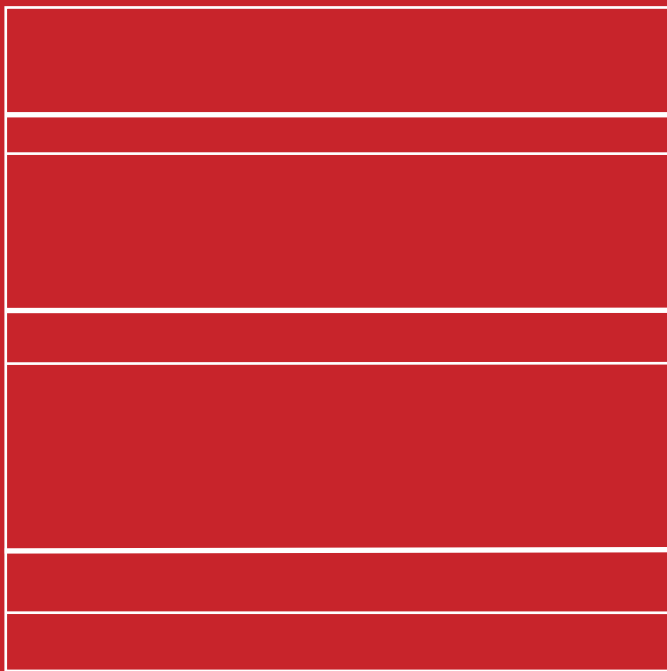

at a glance

Subsequent dimensions are available:

Width x Height	No. of internal shelves, Depth	Code
22.8 x 22.8 in (XS)	Three internal shelves, depth each 5.1 in (13 cm)	3x13/
22.8 x 46.0 in (S)	Three or four internal shelves, depth 7.0-11.8 in (18-30 cm)	4x18/ 18/24/30/ 3x24/
46.0 x 46.0 in (M)	Three or four internal shelves, depth 7.0-11.8 in (18-30 cm), also as concave or convex corner solutions	4x18/ 18/24/30/ 3x24/
92.5 x 22.8 in (LS)	One or two internal shelves, depth 7.0 or 11.8 in (18 or 30 cm), also as concave or convex corner solutions	2x18/ 1x30/
115.7 x 31.1 in (XLS)	One internal shelf, depth 13.7 in (35 cm), also as concave or convex corner solutions	1x35/
57.6 x 57.6 in (XL)	Special solutions on request depth 11.8 in (30 cm)	3x30/

Each internal shelf is designed for loads up to 45 lb/yd (~20kg/m).

assembling guide

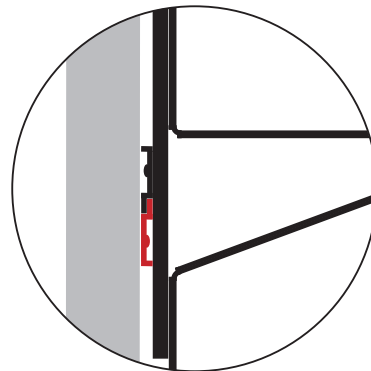

The attachment to the wall is by use of the supplied aluminium profiles on the back side. On the backside of shelves clips are already pre-assembled.

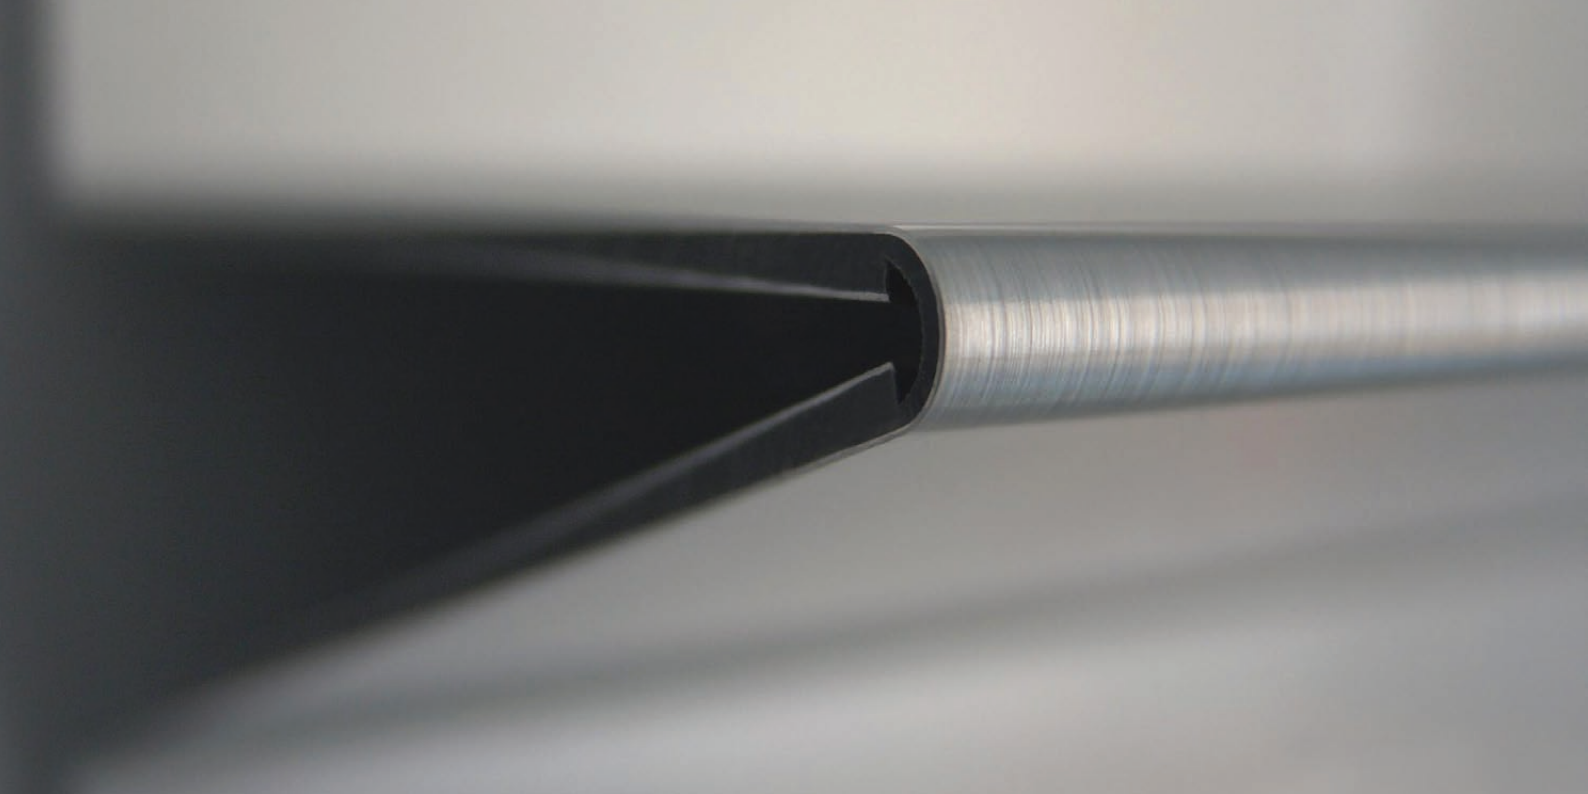

On wall side they have to be fixed accordingly to the boreholes in the profiles.

The horizontal distances of profiles changes depending on the version. Detailed directions you can find in each package.

Version XS do not need profiles - you can just fix it with supplied hooks at the wall.
